### 1. Legacy Unveiled

The Royal Institution is an organisation that has been around for 209 years. Many of the people that have worked here have been scientists themselves, including Michael Faraday. He made the discoveries that may be generating a using electricity much easier, making it possible for us all to switch on lights, cook for dinner, play games consoles much more.

### 2. Marijuana Debate

Another administration option is to bake marijuana at a relatively low temperature to kill any dangerous microorganisms and then allow that patient to eat it or drink it. Both of these methods of administration make smoking the drug unnecessary. However, criticism of medical marijuana has also been raised because as a natural plant, it cannot be patented and marketed by pharmaceutical companies and is unlikely to win widespread medical acceptance.

### 3. Tesla vs. Edison

Tesla actually worked for Edison in his early career. Edison offered to pay him the modern equivalent of a million dollars to fix the problems he was having with his DC generators and motors. Tesla fixed Edison's machines and when he asked for the money he was promised, Edison laughed him off and had this to say: "Tesla, you don't understand our American humor". The pair becomes arch rivals.

### 4. Twin Theory

The situation is similar to a pregnant woman that has twin babies in her belly. Avi Loeb of the Harvard Smithsonian Center for Astrophysics. He's proposing the idea in a paper that's been accepted for publication in the Astrophysical Journal Letters.

### 5. Cannabis Benefits

According to a peer reviewed study, medical cannabis led to "a statistically significant improvement" in quality of life, employment status, and in the reduction of the number of medications in those with Tourette Syndrome, in addition to improving comorbidities.

### 6. Money Creation System

Most people do not realize that some banks literally make money by giving loans without having a money deposit. The system is called fractional reserve banking and is used in most economies. It sounds as though it is safe because it says that banks have to keep a fraction of their deposits with the Reserve Bank.

### 7. Majestic Giants

Blue whales are the largest living mammals. Though reports of maximum length and weight vary from one account to another, Antarctic blue whales are known to have reached lengths to 100 feet and weights of over 150 tons before stocks were severely depleted by whaling operations. North Atlantic blue whales may be expected to reach lengths of 80 to 85 feet.

### 8. Nature's Armor

The tortoise size and shell shapes vary depending on where they live. The shell is made of bone and is a dull brown colour. Their ribs, backbone and breast bone have become part of the shell, which is why you can never separate the tortoise from its shell.

### 9. Banking Illusion

Most people do not realise that some banks literally make money by giving loans without having money on deposit. The system is called fractional reserve banking and is used in most economies. It sounds as though it is safe because it says that banks have to keep a fraction of their deposits with the Reserve Bank.

### 10. Mastering Tough Talks

Surprisingly, despite what appear to be infinite variations, all difficult conversations share a common structure. When you're caught up in the details and anxiety of a particularly difficult conversation, this structure is hard to see. But understanding that structure is essential to improve how you handle your most challenging conversations.

### 11. Life in the Wild

The life of a hunter gatherer is indeed, as Thomas Hobbes said of the state of nature, 'solitary, poor, nasty, brutish, and short'. In some respects, to be sure, wandering through the jungle bagging monkeys may be preferable to the hard slog of subsistence agriculture.

### 12. Paradox of Optimism

Yellow is considered the most optimistic color, yet surprisingly, people lose their tempers most often in yellow rooms, and babies cry more in them. The reason may be that yellow is the hardest color on the eye. On the other hand, it speeds metabolism and enhances concentration. Think of yellow legal pads and post it notes.

### 13. The Art of Acting

The training of an actor is an intensive process that requires curiosity, courage, and commitment. You will learn how to prepare for rehearsal, how to rehearse, and how to use independent and proactive processes that inform you to do the best work possible for both stage and screen.

### 14. Science and Nature

Botanic gardens are scientific and cultural institutions established to collect, study, exchange, and display plants for research and for the education and enjoyment of the public. There are major botanic gardens in each capital city. Zoological parks and aquariums are primarily engaged in the breeding, preservation, study and display of native and exotic fauna in captivity.

### 15. Whale Strandings

Mass strandings of whales are a recurring issue in Australia and New Zealand. In recent years, multiple events have highlighted the severity of this problem. For instance, in April 2024, around 160 pilot whales stranded on a Western Australian beach, prompting a significant rescue operation by marine biologists and wildlife officers.

### 16. Evolution of Adventure

Variations kept the genre alive. From the mid 19th century onwards, when mass literacy grew, adventure became a popular subgenre of fiction. Although not exploited to its fullest, adventure has seen many changes over the years - from being constrained to stories of knights in armor to stories of high-tech espionage.

### 17. New Concussion Treatment

Individuals who suffer from concussions often experience moderate to severe headaches in the weeks following the injury. However, a recent study has discovered that a combination of two commonly used anti nausea medications, administered intravenously in the emergency room, may provide more effective relief for these headaches compared to a placebo.

### 18. Social Sciences Research

At our institution, we recognize the importance of research in the humanities and social sciences. We are committed to advancing knowledge in these fields through rigorous research and analysis. Our research agenda is driven by the pursuit of new insights that can benefit society both locally and globally. We offer a wide range of programs in the humanities and social sciences.

### 19. Adolescent Depression

Rates of depression have been a growing concern in recent years, particularly among adolescents and adults. In the United States, it is estimated that 4.1 million adolescents aged 12 to 17 have experienced at least one major depressive episode. This indicates a rising trend in depression rates among adolescents.

### 20. Choking Tips

You ought to know what to do to help a person who is choking. First, you stand behind the choking victim and put your arms around his or her waist. Second, you make a fist and place the thumb side against the person's stomach just above the navel, but below the ribs.

### 21. Origins of Theatre

In addition to exploring the possible antecedents of theatre, scholars have also theorised about the motives that led people to develop theatre. Why did theatre develop, and why was it valued after it ceased to fulfill the function of ritual? Most answers fall back on theories about the human mind and basic human needs.

### 22. Agriculture and Ethics

Agricultural problems due to climate change of normal weather, water depletion and the collapse of soil have become big problems in all parts of the world. Many are now focusing on ethics and family farming as a way to combat these issues.

### 23. Child Development

Within this free course, you will be introduced briefly to the discipline of child psychology and to theories and approaches that have been developed to help us understand and support children's lives by focusing on the individual children. Psychologists can assess changes in their child's abilities over time, including their physical, cognitive, social, and emotional development.

### 24. Political Thought

The course considers the ways in which thinkers have responded to the particular political problems of their day and the ways in which they contribute to a broader conversation about human goods and needs, justice, democracy, and the proper relationship of the individual to the state.

### 25. Systems and Adaptation

The networks of roots that plants use to absorb water and nutrients can encompass a space larger than the part of the plant visible above ground. The nature of these roots systems can help plants adapt to challenging environments such as deserts. For instance, mesquite trees can develop tap roots capable of digging more than 50 yards deep to reach water.

### 26. Importance of Hydration

Your body is nearly two-thirds water. And so it is really important that you consume enough fluid to stay hydrated and healthy. If you don't get enough fluid you may feel tired, get headaches, and not perform at your best.

### 27. Cultural Attendance

To some extent, attendance at cultural venues and events is influenced by a person's age and the composition of the household in which they live. For example, those people in households with dependent children were more likely to visit zoological parks and aquariums than people living in single person households.

### 28. University Guidance

Your tutor helps you make the most of your time at university by giving you guidance and support along the way. All new students are allocated a personal tutor who will encourage you to get the most out of your course, direct you to other sources of support and help you achieve your goals.

### 29. Development of Hearing

Most babies start developing their hearing while still in the womb, prompting some hopeful parents to play classical music to their pregnant bellies. Some research even suggests that infants are listening to adult speech as early as 10 weeks before birth, gathering the basic building blocks of their family's native tongue.

### 30. Texas Abortion Law

The Texas law prohibiting abortion after detectable embryonic cardiac activity was associated with a decrease in state abortions and an increase in residents obtaining out-of-state abortions. The proportion of out-of-state abortions obtained at 12 weeks increased significantly from 17.1% to 31%.

### 31. Young Adults

People in their 20s and 30s who drink moderate to heavy amounts of alcohol may be more likely to have a stroke as young adults than people who drink low amounts or no alcohol, according to a study. The risk of stroke increased the more years people reported moderate or heavy drinking.

### 32. Property Licensing

A common way of permitting others to use an intellectual property right is to give express permission for it. This can be done in return for financial remuneration. In such cases, the holder of an intellectual property right is often referred to as granting a licence to use what the holder otherwise has exclusive rights to, subject to certain conditions.

### 33. Benefits of Fencing

The benefits of home fencing are not only as a barrier between the area of the house and the surrounding environment. In simple words, a fence is a formation or structure that is above the ground and is generally vertical, with the intention of limiting an area or area, protecting everything inside the fence, from threatening danger from outside the fence.

### 34. Pandemic Paradox

The conviction that the COVID-19 pandemic was a hoax, implying an exaggeration of its severity or a deliberate release for nefarious purposes, serves as a "gateway" to embracing broader conspiracy theories. According to a study, those skeptical of the pandemic were also inclined to believe in fraud during the 2020 election.

### 35. Cosmic Mystery

Astronomers announced that they have finally assembled an image of the supermassive black hole at the centre of our galaxy. This image shows a bright ring surrounding the darkness, the telltale sign of the shadow of the black hole. It reveals the turbulent, twisting region immediately surrounding the black hole in new detail.

### 36. Artist's Process

We can see from the X rays that at an early stage of painting, a window was painted in at the left of the portrait. It seems that there may have been two windows in the initial design for the portrait or that the window was moved at an early stage.

### 37. Frozen Continent

The world's fifth largest continent: Antarctica is almost entirely covered by ice 2000 meters thick. The area sustains varied wildlife including seals, whales, and penguins. The Antarctic treaty signed in 1959 and enforced since In 1961 provides for international governance of Antarctica.

### 38. Structure of Organs

Tissues are grouped together in the body to form organs. These include the brain, heart, lungs, kidneys, and liver. Each body organ has a specific shape and is made up of different types of tissue that work together. For example, the heart consists mainly of a specialized type of muscle tissue, which contracts rhythmically to provide the heart's pumping action.

### 39. Mineral Wealth

Australia has one of the world's most important mining industries. It is a major exporter of coal, iron ore, gold, and copper and is self sufficient in all minerals and bar petroleum. Since the first discoveries, the coal in 1798, mineral production has risen every year in the decade, and in 1992 it doubled.

### 40. Radical Shift

Lincoln's apparently radical change of mind about his war power to emancipate slaves was caused by the escalating scope of the war, which convinced him that any measure to weaken the Confederacy and strengthen the Union war effort was justifiable as a military necessity.

### 41. Farming Evolution

Shrimp farmers used to hold animals in nursery ponds for 30 to 60 days; now they try to move them into grown out ponds in less than 30 days. This reduces stress on the animals and dramatically increases survival in the grow out ponds. Many farms that abandoned nursery ponds have gone back to them, and the results have been surprisingly positive. They are using the old, uncovered, earthen, nursery ponds.

### 42. Women Voters

While the Republican field is packed with male candidates, so far, some of the sharpest Clinton critics have come from women. Democrats successfully campaigned on an alleged GOP perpetrated "war on women" in 2012 but faltered in 2014 when they tried the same tactic. With Hillary Clinton as the likely Democratic nominee, the fight for women voters will be a central part of the 2016 campaign.

### 43. Global Air Guard

The installation of monitors and the dissemination of air quality readings by U.S. embassies globally led to a notable decrease in air pollution levels. This positive outcome significantly improved the health of city residents, highlighting the potential effectiveness of similar monitoring and information-based interventions.

### 44. Remarkable Rise

A young man from a small provincial town, a man without independent wealth, without powerful family connections and without a university education moved to London in the late 1580s and, in a remarkably short time, became the greatest playwright not of his age alone but of all time. How did Shakespeare become Shakespeare?

### 45. Political Challenges

The course examines how intellectuals have addressed the specific political challenges of their time and how their insights enrich a broader discussion on human well-being, societal necessities, justice, democratic principles, and the appropriate connection between individuals and the government.

### 46. Proper Hydration

Your body comprises approximately two-thirds water. Therefore, it is crucial to ensure you consume an adequate amount of fluid to maintain proper hydration and overall well-being. Insufficient fluid intake can lead to fatigue, headaches, and reduced performance levels.

### 47. Time Preference

Delay discounting, the diminishing value of future outcomes, is closely linked to cigarette and tobacco use. Grasping this concept is crucial for effective tobacco cessation efforts, offering insights into addiction and inter-temporal decision-making. Acknowledging delay discounting as a therapeutic target can greatly enhance strategies for combating tobacco addiction.

### 48. Cultural Norms

For a culture to work and survive, its members need to follow its rules and norms. People must want to fit in and obey these rules. First, they have to learn and accept the norms and values of the culture. Then, they need to teach these norms and values to their children.

### 49. Exploring Humanities

We think that studying subjects like history and society is really important. Our goal is to find out new things that can help both Australia and the world. We have a big range of courses in history and society, more than most places in Australia and the Asian Pacific area.

### 50. Materiality

The biggest difference between traditional Chinese and Western architecture is the building material. Ancient Western buildings were mostly made of stone, making them grand and long-lasting. In contrast, ancient Chinese buildings were made of wood, using complex mortise and tenon joints to create a unique style.
